

Wilsonart® HPL Metalamine

TECHNICAL DATA SHEET FOR SURFACE FINISHES – **Brushed 408**

Data Sheet 1.11-BM
October 2021
Page 1 of 2

DESCRIPTION

Wilsonart Metalamine is designed for vertical interior or ceiling applications where a special accent is required, or a special mood is desired.

The surface of Metalamine is that of fine finished metal. The genuine metal material is appropriate for **vertical areas** in retail facilities, hotel and office lobbies, theatres and restaurants, where its special eye-catching properties add a definite prestigious appeal. Metalamine add a visual sense of lightness when used as inserted accent banding in massive casework.

PRODUCT RANGE - 408

Décor Code	Décor Name	Thickness (mm)	Size (mm)
3961-B	Brushed Champagne	0.8	1,220 x 2,440
3951-B	Brushed Brass	0.8	1,220 x 2,440

PRODUCT COMPOSITION - 408

Anodizing is defined as an electro-chemical process that thickens aluminium's natural oxide coating. The coating is clear and colourless and makes the surface resistant to corrosive conditions, wear and scratching. The aluminium can also be dyed a variety of colours during anodizing that cannot wash or rub off, such as gold, black, bronze, copper and grey.

Finished sheets are trimmed, and the backs sanded, to facilitate bonding. Note: All Wilsonart Metalaminat is supplied with a protective peel coat to prevent surface damage during shipping and fabrication.

ENVIRONMENTAL CERTIFICATION

The GREENGUARD Environmental Institute™ has awarded its GREENGUARD Indoor Air Quality Certification to Wilsonart Laminate. All Wilsonart Laminate product types were tested under the stringent GREENGUARD Standards for low-emitting products. All GREENGUARD Indoor Air Quality Certified® products ensure minimal impact on the indoor environment.

CARE AND MAINTENANCE

It is recommended surfaces be cleaned with Glass & Surface Cleaner and warm water with a mild soap such as those used for hands or dishes. Household cleaners, non-ammoniated detergents, or glass cleaners may be used. Stubborn stains may be removed with a thin clean oil and a dry cloth.

After cleaning, always wipe the surface completely dry with a soft, clean cloth. Do NOT use cleaners that contain abrasives, acids or alkalis, as they will mar the surface.

Ammoniated detergents or petroleum-based cleaners should not be used to clean anodised aluminium surfaces. Do NOT clean metal face with solvents, paint thinner or adhesive remover.
